

February 2021

Launch of Lief Parke LLP

Lief Parke LLP is pleased and excited to announce its launch.

Our new firm represents the third time that the founding partners have practiced together. The first time was a quarter century ago as associates at an elite New York intellectual property firm and the second as fellow partners in another prestigious IP firm. This venture was born out of shared views and values about practicing law.

Our practice will be focused on intellectual property litigation and counseling. From patents on pharmaceuticals, biotechnology, medical devices, computer applications, and other technologies to trademarks, trade secrets, and copyrights, we litigate, negotiate, and advise on issues core to your business.

Our launch occurs during a global pandemic that has, among other things, highlighted the value of science and innovation. The past year also has caused people to reassess how and where they work. In law, it has become clear that current technology allows for efficiencies beyond those imaginable even a few years ago. We noticed.

Like our clients, our firm aspires to be an innovative enterprise. We believe that lean and efficient teams of accomplished, experienced lawyers represent the future of litigation and law. Lief Parke will practice at the highest levels with *Innovation and Integrity*.

We would be honored to represent you.

Jason A. Lief
